Experience

Market and Liquidity Risk Internship (incoming) — Incoming
ABN AMRO Bank N.V., Amsterdam

- Will produce **reports for the market and liquidity risk management team**
- Will contribute to wider projects across the team, including **stress testing**

Chair, Lustrum Committee — Sep 2024 – Mar 2025
Vectum, Study Association for Econometrics & Operations Research, Maastricht University

- Led a **team of six** to plan and deliver the association's lustrum programme, including a gala evening and an alumni networking event
- Owned **logistics, budgeting and stakeholder communication** end to end, coordinating between students, alumni, university staff and external venues
- Ran the outreach that brought alumni and partner organisations into the programme

Research & Quantitative Projects

Bachelor's Thesis: Monetary Policy Transmission in the Euro Area, Low-Cash versus High-Cash Economies — Graded 9.0/10
Supervisor: Enrico Wegner, Maastricht University, June 2026

- Estimated **country-level structural VARs for thirteen euro-area economies** using high-frequency monetary policy surprises from the Euro Area Monetary Policy Database
- Pooled the impulse responses in a **cross-country regression** interacting each horizon with the country's cash share; higher cash usage is associated with a weaker GDP response, robust to dropping any single country
- Implication for EU policy: a digital euro, by drawing cash transactions into the banking system, could strengthen transmission where it is currently weakest

Other quantitative coursework projects — Maastricht University

- **Policy impact assessment** in Stata: assessed the economic impact of selected public policies and wrote up the results for a non-specialist reader
- **Forecasting and optimisation** in Julia and Java applied to an industrial firm's operations (SABIC); time-series model of Dutch temperature trends in R

Education

BSc Econometrics & Operations Research
Maastricht University, School of Business and Economics
Expected graduation: winter 2026-27

Semester Abroad
Università di Roma Tor Vergata
Completed February 2026

Languages

Albanian	Native
English	C1
French	B2
Italian	Basic professional
Turkish	B1
Greek	Basic

Skills

STATISTICAL & PROGRAMMING
Python, **R**, **Stata**, Julia, Java, LaTeX, GitHub

METHODS
Econometric modelling, regression & classification, time series, forecasting, optimisation, mathematical statistics

COMMUNICATION
Report writing, presenting results to non-technical audiences, Microsoft Office incl. PowerPoint

Certifications

Evaluating Social Programs
J-PAL and MITx, Massachusetts Institute of Technology

EU Policy and Implementation: Making Europe Work!
Leiden University, Faculty of Governance and Global Affairs

Selected Coursework

Econometric Methods I & II · Macroeconomics & Finance · Microeconomics · Mathematical Statistics · Optimization · Operations Research · Probability Theory · Institutional Economics · Market Design

Interests

European economic policy · Monetary policy · Regional development and the Western Balkans · History · Arts
